## 1. Sales Performance Analysis

Based on the provided sales data, here is a structured analysis:

### 1. Top 3 Performing Products (by Revenue)

1. **Laptop Air (P010)**

- Revenue: \$237,600 (March 21, 2026)
- Units Sold: 297
- Profit: \$94,500.12

2. **Laptop Air (P010)**

- Revenue: \$56,000 (February 3, 2026)
- Units Sold: 70
- Profit: \$20,369.22

3. **FitBand Pro (P002)**

- Revenue: \$39,480 (February 12, 2026)
- Units Sold: 329
- Profit: \$19,427.07

### 2. Bottom 3 Performing Products

1. **PowerBank Max (P004)**

- Revenue: \$15,520 (April 7, 2026)
- Units Sold: 194
- Profit: \$5,359.72

2. **FitBand Pro (P002)**

- Revenue: \$13,320 (March 18, 2026)
- Units Sold: 111
- Profit: \$4,326.74

3. **FitBand Pro (P002)**

- Revenue: \$12,120 (January 7, 2026)
- Units Sold: 101
- Profit: \$5,046.43

### 3. Best Performing Region

- **Central Region**
- Total Revenue:  $\$56000 + \$86400 + \$237600 = \$379,000$
- Total Profit:  $\$20369.22 + \$28415.73 + \$94500.12 = \$143,285.07$

### 4. Worst Performing Region

- **East Region**
- Total Revenue:  $\$13,320 + \$15,520 = \$28,840$
- Total Profit:  $\$4,326.74 + \$5,359.72 = \$9,686.46$

### 5. Products with Highest Return Rates

1. **FitBand Pro (P002)**
  - Returns: 13 (February 12, 2026)
  - Units Sold: 329
  - Return Rate: 3.95%
2. **\*\*FitBand Pro**

## 2. Customer Feedback Analysis

---

### Customer Feedback Analysis

#### 1. Overall Sentiment Breakdown

- **Positive Sentiment:** 74% (14 out of 19 reviews)
- **Negative Sentiment:** 21% (4 out of 19 reviews)
- **Neutral Sentiment:** 5% (1 out of 19 reviews)

#### 2. Top 5 Most Common Complaints

1. **Customer Support Issues:**
  - "Customer support could be better." (mentioned in multiple reviews for Laptop Air)
2. **Performance Concerns:**
  - "Good overall but has room for improvement." (mentioned for Laptop Air)
3. **Returns:**
  - Higher return rates noted for Laptop Air and Tablet Lite, indicating potential dissatisfaction.
4. **Quality Control:**
  - Indications of issues leading to returns, particularly for products with lower ratings.
5. **Price vs. Value:**
  - Implicit concerns about whether the products are worth their price based on some reviews.

#### 3. Top 5 Most Common Praises

1. **Performance Satisfaction:**
  - "Very satisfied with the performance." (common across multiple products)
2. **Quality of Product:**
  - "Very satisfied with the performance." (repeated for NoiseBuds Air and Tablet Lite)
3. **Design and Usability:**

- Implied satisfaction with the design and usability in positive reviews.

#### 4. Value for Money:

- Positive sentiments regarding the perceived value of products, especially in the Audio category.

#### 5. Customer Experience:

- General satisfaction with the purchasing experience, as indicated by new customer numbers.

### 4. Products with Best Customer Sentiment

- **NoiseBuds Air (P003):**
  - Average Customer Rating: 4.8
  - Positive Reviews: "Very satisfied with the performance." (multiple mentions)
- **Tablet Lite (P009):**
  - Average Customer Rating: 4.65
  - Positive Reviews: "Very satisfied with the performance." (multiple mentions)

### 5. Products with Worst Customer Sentiment

- **Laptop Air (P010):**
  - Average Customer Rating: 4.2
  - Complaints about customer support and higher return rates.
- **Tablet Lite (P009):**
  - Noted higher returns in certain regions, despite overall positive sentiment.

### 6. Average Rating by Product Category

## 3. SWOT Analysis

---

### SWOT Analysis

#### STRENGTHS (Internal Positives)

1. **High Revenue from Top Products:** The Laptop Air (P010) generated significant revenue of \$237,600 in March 2026, indicating strong market demand and brand recognition. This product alone contributed a profit of \$94,500.12, showcasing its profitability.
2. **Strong Performance in Central Region:** The Central Region has the highest revenue of \$379,000, indicating effective market penetration and customer engagement in that area. This region's total profit of \$143,285.07 demonstrates a successful sales strategy.
3. **Positive Customer Sentiment:** With 74% of customer feedback being positive, the company has a solid reputation among its customer base. This is further supported by high ratings for products like NoiseBuds Air (4.8) and Tablet Lite (4.65), which enhances brand loyalty.
4. **Diverse Product Portfolio:** The presence of multiple product categories (laptops, fitness bands, audio devices) allows for cross-selling opportunities and caters to a broader audience, reducing reliance on a single product line.
5. **High Sales Volume of FitBand Pro:** Despite being in the bottom three for revenue, the FitBand Pro (P002) sold 329 units in February 2026, indicating a strong customer interest that can be leveraged for future marketing and product improvements.

#### WEAKNESSES (Internal Negatives)

- 1. **Customer Support Issues:** Multiple reviews highlighted dissatisfaction with customer support, particularly for the Laptop Air, which could lead to customer churn and negative word-of-mouth.
- 2. **High Return Rates for Certain Products:** The FitBand Pro (P002) has a return rate of 3.95%, which is concerning and suggests potential quality control issues. This could impact profitability and customer satisfaction.
- 3. **Underperformance of Certain Products:** The PowerBank Max (P004) generated only \$15,520 in revenue, indicating it is not resonating with customers. This could lead to excess inventory and increased costs.
- 4. **Price vs. Value Concerns:** Customer feedback indicates some skepticism regarding whether the products offer good value for their price, which could deter potential buyers and affect sales.
- 5. **Negative Sentiment for Laptop Air:** Despite being a top seller, the Laptop Air has a relatively low average rating of 4.2, with specific complaints about performance and returns,

## 4. Feature Prioritization

Based on the provided sales data and customer feedback, here is a structured prioritization of product improvements and feature opportunities:

### 1. TOP PRIORITY Improvements (Must Fix Immediately)

These improvements address critical issues affecting customer satisfaction and product performance.

| Improvement                                           | Score (out of 10) | Reasoning                                                                                                 |
|-------------------------------------------------------|-------------------|-----------------------------------------------------------------------------------------------------------|
| Improve Customer Support for Laptop Air (P010)        | 9                 | High return rates and complaints about customer support indicate urgent need for enhancement.             |
| Address Quality Control Issues for FitBand Pro (P002) | 8                 | Multiple returns and negative feedback about build quality necessitate immediate action.                  |
| Reduce Return Rates for PowerBank Max (P004)          | 8                 | High return rates suggest dissatisfaction; addressing this could improve sales and customer satisfaction. |
| Enhance Performance of Smart Speaker (P007)           | 7                 | Low customer ratings and complaints about build quality indicate a need for improvement.                  |

### 2. MEDIUM PRIORITY Features

These features can enhance the product experience but are not as urgent as the top priority improvements.

| Feature                                                  | Score (out of 10) | Reasoning                                                                        |
|----------------------------------------------------------|-------------------|----------------------------------------------------------------------------------|
| Add Customization Options for SmartWatch X (P001)        | 7                 | Increased personalization could attract more customers and enhance satisfaction. |
| Introduce New Color Variants for FitBand Pro (P002)      | 6                 | Aesthetic appeal can drive sales, especially if quality issues are resolved.     |
| Implement Advanced Features for Wireless Keyboard (P006) | 6                 | Enhancing functionality could improve user experience and reduce return rates.   |

| **Launch a Marketing Campaign Highlighting Customer Satisfaction for NoiseBuds Air (P003)** | 5 |  
Leveraging positive sentiment can boost sales further. |

3. LOW PRIORITY Items

These items are less critical and can be addressed later.

| Item | Score (out of 10) | Reasoning |

|-----|-----|-----|

| **Minor Design Tweaks for Tablet Lite (P009)** | 5 | While there are positive sentiments, minor adjustments can be made after addressing more critical issues. |

| **Explore Bundling Options for Accessories** | 4 | Could enhance sales but not urgent given current performance metrics. |

| **Expand Distribution Channels for Smart Speaker (P007)** | 4 | While this could increase visibility, current performance issues need

5. Strategic Recommendations

1. STRATEGIC RECOMMENDATIONS

- 1. **Enhance Customer Support:** Implement a dedicated support team for high-return products, particularly the Laptop Air and FitBand Pro, to address customer concerns promptly. This could include training existing staff and introducing a ticketing system for better tracking.
- 2. **Quality Control Improvement:** Establish a quality assurance task force to investigate and rectify the issues leading to high return rates for FitBand Pro and PowerBank Max. This should include a review of manufacturing processes and supplier quality checks.
- 3. **Product Performance Optimization:** Invest in R&D; to enhance the performance of the Laptop Air and Smart Speaker. This could involve software updates, hardware improvements, or user feedback integration to address performance concerns.
- 4. **Targeted Marketing Campaigns:** Launch a marketing initiative focusing on the strengths of high-performing products like NoiseBuds Air and Tablet Lite. Highlight positive customer reviews and satisfaction ratings to attract new customers.
- 5. **Product Diversification:** Explore the introduction of new color variants and customization options for the FitBand Pro to cater to diverse customer preferences, increasing its appeal in the market.
- 6. **Sales Strategy Refinement:** Focus on the Central Region for targeted promotions and incentives to capitalize on its strong performance. Conversely, develop a recovery strategy for the East Region, including localized marketing efforts and partnerships.
- 7. **Customer Feedback Loop:** Create a structured feedback loop to continuously gather and analyze customer feedback post-purchase, allowing for ongoing product improvements and adjustments based on real-time data.

2. 90-DAY ACTION PLAN

Week 1-2:

- Assemble a cross-functional team to address customer support issues.

- Initiate a quality control review for FitBand Pro and PowerBank Max.
- Analyze customer feedback for common themes and prioritize issues.

**Week 3-4:**

- Develop a training program for customer support staff focused on high-return products.
- Begin R&D; discussions for performance enhancements on Laptop Air and Smart Speaker.
- Launch a marketing campaign for NoiseBuds Air, leveraging positive customer sentiment.

**Week 5-6:**

- Implement a ticketing system for customer support inquiries.
- Start quality control audits and supplier reviews.
- Gather feedback from customers on proposed changes and enhancements.

**Week 7-8:**

- Review progress on customer support improvements and quality control measures.
- Finalize performance enhancement plans for Laptop Air and Smart Speaker.
- Prepare a report
